

string

dvutil/ref.h

inetaddress.h

```
graph BT; inetaddress.h --> string; inetaddress.h --> dvutil/ref.h
```

The diagram illustrates the dependencies of the `inetaddress.h` header file. At the bottom, a black box with white text contains `inetaddress.h`. Two blue arrows originate from this box and point upwards to two other boxes. The left box, with a gray border and white text, contains `string`. The right box, with a black border and white text, contains `dvutil/ref.h`. This visualizes that `inetaddress.h` includes or depends on both `string` and `dvutil/ref.h`.
